引文與參考書目

Introduction

Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2004). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to be effective in controlling nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio *et al.*, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are also related to autonomic nervous activity (Morroni *et al.*, 1996), it is speculated that the autonomic nervous activity might be checked. A clinical trial in the P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Studies have shown that vagal modulation, and the restoration of vagal modulation is associated with the improvement

Stereotactic Body Radiation Therapy for Prostate Cancer—A Review

Waqar Haque, E Brian Butler, Bin S Teh
PMID: 28917248 DOI: 10.21037/cco.2017.01.001

Access Options...

Abstract

Prostate cancer can be managed with external beam radiation therapy, delivered with either protons or photons, brachytherapy, surgery, or active surveillance. Advances in imaging and radiation therapy delivery have allowed treatment of prostate cancer using ultra-hypofractionated radiation therapy with a high dose per fraction using a technique called stereotactic body radiation therapy (SBRT). While no randomized trials have compared the efficacy of SBRT to conventionally fractionated radiation therapy (CFRT), numerous prospective trials and retrospective reviews have demonstrated the safety and efficacy of SBRT for localized prostate cancer, used either definitively or as a boost along with CFRT. Prostate cancer SBRT may be more cost effective than CFRT using intensity modulated radiation therapy (IMRT) or proton based radiation therapy.

Hubble telescope maps Voyager probes' cosmic road trip

Analysis reveals the gas clouds the far-flung spacecraft will encounter.

As they sail into interstellar space, NASA's twin Voyager probes are entering a mysteriously complex realm. The spacecraft aren't in completely uncharted territory though. ...

 An Erratum to this article was published on 25 January 2017

Abstract

Despite the global prevalence of gastric disease, there are few adequate models in which to study the fundus epithelium of the stomach. We have generated and characterized differentiated human pluripotent stem cells that form organoids containing fundic epithelium by

SUPPLEMENTARY INFORMATION

doi:10.1038/nature20584

Supplementary table 1 | Equations describing the 'Likely water' cluster hull and cluster overlaps in the multidimensional feature-space.

These equations describe the 'Likely water' cluster in the multidimensional feature-space. By definition, part of this cluster contain pixels that are not water, and request additional processing steps to be properly assigned. The method section provides details about the usages of this equations within the expert system classifier.

Name	Description	Equations describing the "Likely water" cluster hull and cluster overlaps in the multidimensional feature-space
water1	Water cluster where NDVI < 0	$b('value') < 0.62 \&\& (((b('hue') < ((-9.867784585617413 * b('nd')) + 238.26034242940045)) \&\& (b('hue') > ((-12960.000000000335 * b('nd')) - 12714.048607819708)) \&\& (b('hue') > ((23.627546071775214 * b('nd')) + 255.53176874753507))) \vee (((b('hue') < ((-54.685799109352004 * b('nd')) + 215.15052322834936)) \&\& (b('hue') < ((23.627546071775214 * b('nd')) + 255.53176874753507)) \&\& (b('hue') > ((-7.321079389910027 * b('nd')) + 224.6166270396205))) \vee (((b('hue') < ((-172.0408163265306 * b('nd')) + 191.69646750224035)) \&\& (b('hue') < ((-$

Abstract: Chronic allergic inflammatory diseases are a major cause of morbidity, allergic asthma alone affecting over 300 million people worldwide. Epidemiological studies demonstrate that environmental stimuli are associated with either promotion or prevention of disease. Major reductions in asthma prevalence are documented in European and US farming communities. Protection is associated with exposure of mothers during pregnancy to microbial breakdown products present in farm dusts and unprocessed foods, and enhancement of innate immune co-operation in the children. We sought to develop a scientific rationale for progressing these findings towards clinical application for primary disease prevention. Treatment of pregnant mice with a defined clinically-approved immunomodulator was shown to markedly reduce susceptibility of their offspring to development of the hallmark clinical features of allergic airway inflammatory disease. Mechanistically,

Little is known about PM1 effects on respiratory health, relative to larger size fractions (PM2.5). To address this literature gap, we assessed associations between PM1 exposure and asthmatic symptoms in Chinese children and adolescents, compared with PM2.5 (Strotz, 1956; Teesalu, Airaksinen, Tuulonen, Nieminen, & Alanko, 1997).

METHODS: A total of 59,754 children, aged 2-17years, were recruited from 94 kindergartens, elementary and middle schools in the Seven Northeast Cities (SNEC) study, during 2012-2013.

Strotz, R. H. (1956). MYOPIA AND INCONSISTENCY IN DYNAMIC UTILITY MAXIMIZATION. *Review of Economic Studies*, 23(62), 165-180.

Teesalu, P., Airaksinen, P., Tuulonen, A., Nieminen, H., & Alanko, H. (1997). Fluorometry of the crystalline lens for correcting blue-on-yellow perimetry results. *Investigative Ophthalmology & Visual Science*, 38(3), 697-703.

Little is known about PM1 effects on respiratory health, relative to larger size fractions (PM2.5). To address this literature gap, we assessed associations between PM1 exposure and asthmatic symptoms in Chinese children and adolescents, compared with PM2.5 (Strotz, 1956; Teesalu, Airaksinen, Tuulonen, Nieminen, & Alanko, 1997).

METHODS: A total of 59,754 children, aged 2-17years, were recruited from 94 kindergartens, elementary and middle schools in the Seven Northeast Cities (SNEC) study, during 2012-2013.

Strotz, R. H. (1956). MYOPIA AND INCONSISTENCY IN DYNAMIC UTILITY MAXIMIZATION. *Review of Economic Studies*, 23(62), 165-180.

"Birdbrain" should be a compliment(Binfield, 2008).

Pioneers in avian intelligence have found that although birds' brains are very small, they are incredibly intelligent, and sometimes have surprising similarities to the behavior or brain functions of humans. Examples range from the cockatoo who was the first animal documented to dance to a beat to Irene Pepperberg's in-depth studies done with the African grey parrot Alex (named for Avian Learning EXperiment).(Laudato, 2010; Pepperberg, 1999) There have even been studies documenting that some birds successfully use, and even modify or build, tools.(Bird & Emery, 2009; Holzhaider et al., 2011; von Bayern, Heathcote, Rutz, & Kacelnik, 2009).

EffiCiency and Safety of an eLectronic cigARette (ECLAT) as Tobacco Cigarettes Substitute: A Prospective 12-Month Randomized Control Design Study

Pasquale Caponnetto^{1,2}, Davide Campagna^{1,2}, Fabio Cibella³, Jaymin B. Morjaria⁴, Massimo Caruso⁵, Cristina Russo^{1,2}, Riccardo Polosa^{1,2*}

Abstract
 Background Electronic cigarettes (e-cigarettes) are becoming increasingly popular with smokers worldwide. Users report buying them to help quit smoking, to reduce cigarette consumption, to relieve tobacco withdrawal symptoms, and to continue having a "smoking" experience, but with reduced health risks. Research on e-cigarettes is urgently needed in order to ensure that the decisions of regulators, healthcare providers and consumers are based on science. Methods ECLAT is a prospective, 12-month randomized, controlled trial that evaluates smoking reduction/abstinence in 300 smokers not intending to quit experimenting two different nicotine strengths of a popular e-cigarette model (Categoria; Arbi Group Srl, Italy) compared to its non-nicotine choice. Group A (n=100) received 7.2 mg nicotine cartridges for 12 weeks; Group B (n=100) a 6-week 7.2-mg nicotine cartridges, followed by a further 6-week 5.8-mg nicotine cartridges; Group C (n=100)

A stack of seven books of various colors (red, yellow, blue, purple, orange, grey) is placed on a light-colored desk. A silver laptop is open to the right of the books, with its screen tilted back. The background is a bright, out-of-focus window. The text "Thank you!" is centered in the upper right area, and "Just do it" is written in a red box on the laptop's keyboard area.

Thank you!

Just do it

攻略任務

1. 掌握資源：自圖書館最新消息下載資料庫總覽
2. 思考研究主題，用一句話寫下，並列出三個關鍵詞
3. 選擇一個關鍵詞利用**MESH on Demand** 找出該關鍵詞在**MESH**裡的寫法並放入**PubMed**看看結果如何？
4. 至**ERMG**下載**Endnote**
5. 將步驟3所搜尋的結果匯入**Endnote**, 完成攻略訓練
